

(Unclassified // FOUO)

CSWC Operational Period Summary

1800 February 20 2018 to 0600 February 21 2018

Pescadero State Beach (meaning "the place to fish" in Spanish) is alongside State Route 1, located 14.5 miles south of Half Moon Bay and 1.5 miles west of the city of Pescadero in San Mateo County. The beach has a mile-long shoreline with sandy coves, rocky cliffs, tide pools, fishing spots and picnic facilities. Across the highway is Pescadero Marsh Natural Preserve, a popular spot for bird watchers and other naturalists.

FIRE ACTIVITY

Cal OES Fire Preparedness Levels

National	Northern California	Southern California
Preparedness Level 1	Preparedness Level 1	Preparedness Level 2
	Multi-Agency Coordination System MACS Mode: 1	Multi-Agency Coordination System MACS Mode: 1

Please note: The National and Regional Preparedness Levels are maintained by the National Multi-Agency Coordination (MAC) Group and are separate from Cal OES activation levels.

Pleasant, Vegetation Fire, Inyo County

Location: Pleasant Valley Dam Rd. x Hwy 395, Northeast of Bishop

Jurisdiction: State DPA, SRA, San Bernardino-Inyo-Mono Unit

Per Cal OES Fire Duty Officer (FDO) and ICS-209 as of 02/20/18 at 1816 hours:

- Cal Fire San Bernardino Unit in Unified Command with Inyo County Sheriff (ICSO)
- 2,275 acres, 50% contained
- 2 structures damaged
- Minimal fire activity with the majority of activity being interior smoldering

Activations

- There are no EOC activations at this time.

Deployments

- 1 Public Safety Communications Technician (PSCT) assigned

Resources Assigned

- 1 Cal OES Type 3 Strike Team

State Assistance Request

- None at this time

FIRE ACTIVITY

Pleasant, Vegetation Fire, Inyo County (Continued)

Mandatory Evacuations

- As of 02/19/18 evacuations have been lifted, with the exception of homes in the area of 5 Bridges and Fish Slough, which are unoccupied by residents and have no power.
 - The Cal OES Law Enforcement Branch continues to monitor and will advise if there are any changes

Critical Infrastructure

- Per the California Utilities Emergency Association (CUEA) as of 02/21/18 at 0633 hours, Southern California Edison (SCE) advises:
 - There are no threats to transmission lines.
 - Sub transmission repairs were completed and all load was restored as of 02/21/18 at 0230 hours.
 - 14 poles were damaged and will be replaced at a later date.

Road Closures

- Pleasant Valley Reservoir Rd.
- Brockman Ln. North of 395
- 5 Bridges Rd. at Jean Blanc
- Dixon Ln. West toward Brockman

Law Enforcement

- Assisting Law Enforcement: Bishop Police Department (PD), Mammoth PD, Mono County Sheriff's Office and CHP

- None reported.

WEATHER OF CONCERN

Weather of Concern

- A dip in the Jet Stream along the West Coast is forecast to bring cooler than average weather over the next 2 weeks for much of California. This should bring snow to the Sierra and potentially the Southern California mountains.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

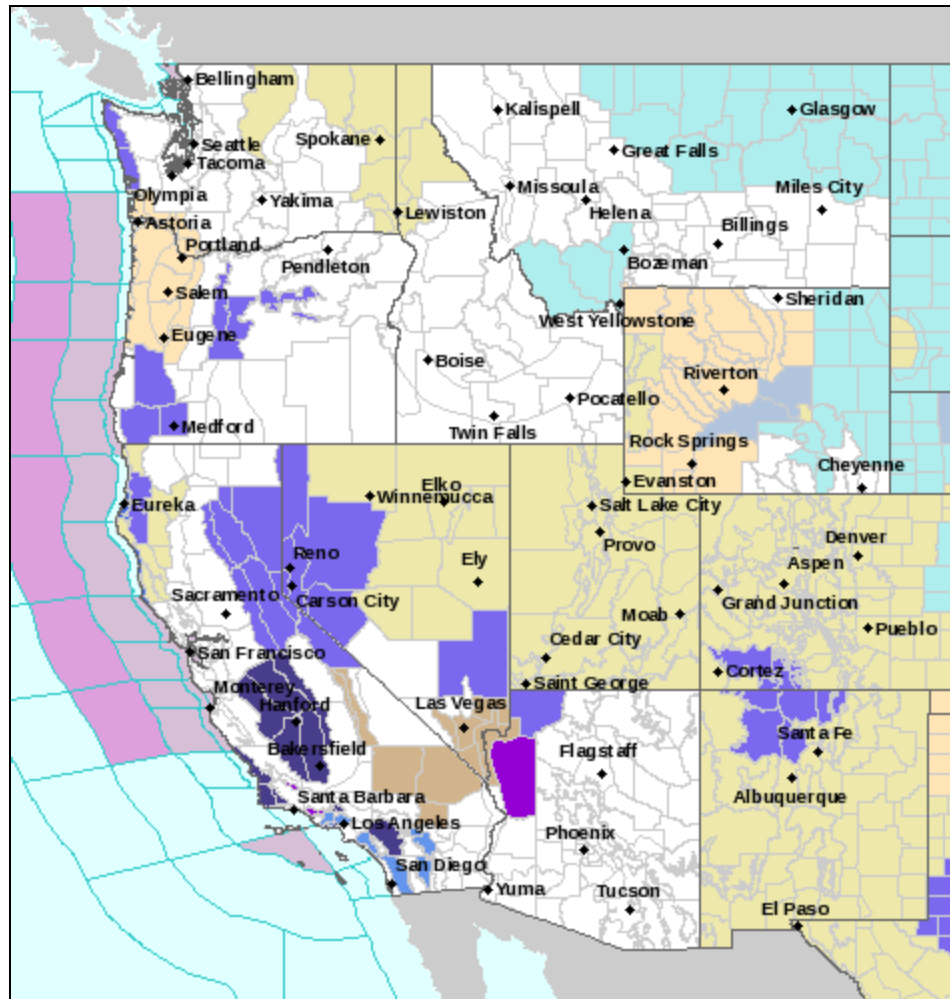

An unsettled and weather pattern will affect the region through the rest of the month. Periods of precipitation, better mixing and cooler than normal temperatures will be the main weather impacts during this period. A series of shortwave Pacific troughs will move over the area and provide periods of lighter rain and snow showers. There will be a secondary dose of precipitation Wednesday night into Thursday. Another wave is expected later during the weekend into early next week. Peak liquid water amounts will generally range between 0.3 to 0.6" with each main system passage. The Sacramento Valley and portions of the Bay area look to receive lesser amounts due to the path of the trough passages. The wind flow will be lighter Wednesday but will increase Thursday and Friday. Peak winds should occur Thursday night during the main cold frontal passage with potential gusts between 40 to 50 mph and possibly more for portions of the Sacramento Valley and higher ridges across the greater Bay area. Lighter winds should return Saturday before another frontal passage late weekend or early next week. Humidity levels don't appear to be unusually low during the next several days including the stronger wind period. High temperatures should be below normal each of the next 7 days. Confidence is pretty solid for the overall pattern shift. This means more precipitation and cooler weather compared to the first two weeks of the month. Timing of the system impacts will most likely change, especially for the weekend and early next week period due to the progressive nature to the atmospheric pattern.

SOUTHERN CALIFORNIA

A deep trough over the West Coast will maintain well below normal temperatures across the region through Friday, with mid 30s to mid 40s across the mountains and 50s to low 60s in the valleys. A couple of weak disturbances in the trough will drop south from Canada bringing scattered showers to the region Wednesday through Friday. Most locations will receive less than a quarter inch of total rainfall with these two disturbances. The snow level will be around 3,000 feet. Westerly winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert areas Thursday. The trough over the West Coast will weaken causing temperatures to warm this weekend, but temperatures will still be a little below normal. Temperatures will become well below normal early next week as the trough strengthens over the West Coast once again. Another disturbance will drop down from Canada bringing scattered showers with light rainfall totals early next week. Snow levels look to remain around 3,000 feet.
